

Class 3m ~ Signs incorporated in the fabric of a building

This sign class applies mostly to historical buildings. It seems as if it is seldom used in modern buildings. It may therefore be a good idea to omit this sign class from the final SAMOAC and if a need for such signs does arise, it may simply be treated as a wall sign ([Class 3c](#)).

It seems as if the time of incorporating names and dates in the fabric of buildings is something of the past (top). A mural with a frame incorporated in the fabric of a building (bottom).
