**CERTIFICATE OF INDEPENDENT BID DETERMINATION**

- 1 This Standard Bidding Document (SBD) must form part of all bids<sup>1</sup> invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>2</sup> Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
  - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
  - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

<sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.

<sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

**CERTIFICATE OF INDEPENDENT BID DETERMINATION**

9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.

<sup>3</sup> Joint venture or Consortium means an association of persons for the purpose of combining their expertise, property, capital, efforts, skill and knowledge in an activity for the execution of a contract.

## **1 PURPOSE**

- 1.1 The Department of Forestry, Fisheries and the Environment (DFFE) requires the services of a suitably qualified independent consultant with extensive and proven experience and knowledge of the South African waste sector, its participants, and the South African waste and industrial policy environment to facilitate and develop a Waste Economy Master Plan. Waste Economy Master Plan will play a key role in unlocking and scaling up economic opportunities within the waste economy value chain.

## **2 BACKGROUND ON MASTER PLANS IN SOUTH AFRICA**

- 2.1 In June 2019, the South African government approved the Re-invigorated Industrial Strategy (RIS) for the country. The foundation of the Industrial Strategy is the development of sector focused Master Plans in 15 identified priority sectors. In South Africa, the Master Plan approach has been successfully implemented in the Automotive sector as well as Clothing and Textile sector over the last 5 years and has proven to be a highly effective means of creating stakeholder support for a coordinated approach for developing and improving industrial sectors.
- 2.2 A Master Plan is a comprehensive plan of action developed by Government, Business and Labour which seeks to achieve a common policy objective such as protection and creation of jobs; deepening capabilities in the sector; expanding exports; and/or preparing for the impact of a policy change. The Master Plan is time-bound and incorporates various actions across the 3 main stakeholders, sequenced to achieve maximum socio-economic impact.

## **3 WASTE ECONOMY MASTER PLAN**

- 3.1 The anticipated Waste Economy Master Plan should make provision and illustrate alignment with the objectives and targets as set out within the National Waste Management Strategy (NWMS- 2020) and the seven (7) priorities of Government.
- 3.2 The Master Plan should also be responsive to the Sustainable Development Goals (SDGs) of Agenda 2030; the National Development Plan (NDP): Vision 2030; relevant strategies and policies of the waste sector; as well as the Chemicals and Waste Economy (CWE) Phakisa- 3 Feet Plan.
- 3.3 The NWMS (2020) provides government policy and strategic interventions for the waste sector and the Master Plan will have to consider the objectives and targets of these interventions in support of unlocking and scaling up economic opportunities within the waste economy value chain.
- 3.4 Of greater importance is the seven (7) priorities of Government and the National Development Plan (NDP): Vision 2030 which are continuously measured to assess government's performance and compliance on delivering promises made to the country. The Master Plan interventions and targets should therefore be

aligned with set policies and strategies; as well as annual resource allocations to ensure successful implementation and collaborations are enabled.

- 3.5 The DFFE CWE Phakisa 3 Feet Plan on the other hand provides actions and targets for chemicals and waste interventions identified and prioritized by the chemicals and waste public and private sector stakeholders as per the CWE Phakisa agreements. The main aim of the implementation of CWE Phakisa 3 Feet Plan is to reduce the negative environmental and health impact of waste and risks posed by chemicals; increase commercialization of the circular economy; create value from resources currently discarded as waste; and foster inclusive growth through positioning of South Africa as a globally competitive producer of sustainable products.
- 3.6 As such, the stakeholder engagement process and the development of the Waste Economy Master Plan requires high-level buy-in and support, as well as on-going engagements between Government, Business and Labour. There is a strong element of evidence-based decision-making required through economic analysis, international benchmarking, case studies and stakeholder engagement. These requirements in turn raise the importance of establishing an engagement platform to manage the Master Plan development process efficiently and collaboratively.
- 3.7 Furthermore, the process for developing this Master Plan should explore and identify industrial performance improvements and highlight competitiveness of industrial companies within the waste sector with government playing a critical role of facilitating and engaging stakeholders working as a collective to build a competitive, dynamic and agile sector to improve economic growth in the country.
- 3.8 It is anticipated that the Service Provider would complete the development of this Waste Economy Master Plan within 6 (six) months from the date of signing a Service Level Agreement (SLA) with DFFE. The Service Provider should be appropriately experienced to conduct a project of this magnitude.

## **4 OBJECTIVES**

- 4.1 The primary objective of this ToR is to provide guidance to suitably qualified independent consultant to submit proposals to facilitate and develop a Waste Economy Master Plan.

## **5 SCOPE AND EXTENT OF WORK**

The scope of this proposed work includes the following:

### **5.1 Waste Sector status quo analysis**

- 5.1.1. Comprehensive review and analysis of the South African waste sector and mapping of the waste economy value chain using the Regional/Global Value Chain (R/GVC) approach focusing on

upstream and downstream linkages, market access and competition; sector dynamics and partnerships.

- 5.1.2 Comprehensive review and analysis of initiatives that require scaling up and can contribute to socio-economic development of the country; with alignment to circular economy; response to Sustainable Development Goals; the National Development Plan (NDP): Vision 2030; National Waste Management Strategy (2020) and the seven (7) Government Priorities. International benchmarking, case studies and best practise should be unpacked as part of providing a strong element of evidence-based decision-making required to support the waste economy value chain.
- 5.1.3 SWOT analysis of the waste sector - based on extensive stakeholder consultation experts from international organizations (local and international); public sector and waste sector value chain participants from up/downstream.
- 5.1.4 Review of the current economic climate and growth potential; as well as opportunities that exist within the waste sector to increase the demand for recycle and circularity of waste materials. This analysis must locate the SA waste sector industry in a global context and draw lessons from international successes.
- 5.1.5 Economic review of the waste economy value chain, looking at current financial support provided or received by Industry, Government and Labour; impact and sustainability of the waste economy value chain activities; and direct/indirect contribution to the South African GDP and international scale.

## **5.2 Legal framework and policy analysis**

- 5.2.1 Comprehensive review and analysis of the waste sector legal framework; policy gaps and conflicts/inter-linkages with other policies/frameworks from other departments and economic sectors (locally and internationally).
- 5.2.2 Review and identification of policy instruments used by South Africa and other economies (countries and/or regional agreements) to successfully support the establishment and/or development of the waste economy value chains.
- 5.2.3 Review and analysis of existing barriers and enablers and key policy challenges identified as part of R/GVC with empirical evidence of policy successes (and/or failures) in nurturing and developing priority competitor economies within the waste economy value chains. Analysis should detail policy interventions on industry growth, sustainability and employment creation within the waste economy.
- 5.2.4 Review and assess current policies and legal frameworks, and identify areas where there is a need for policy review or refinement of policy (options). Develop/identify policy and regulation recommendations that will facilitate with alignments and improvements within the enabling environment for supporting the waste economy sector.

### 5.3 Stakeholder engagement

- 5.3.1 Conduct interviews with key stakeholders within the waste economy value chain to extract information, data, identify case studies and best practice which will help build the case and inform the current status quo analysis of the waste sector value chain (locally and internationally).
- 5.3.2 Convene focused stakeholder meetings/workshops over the first 3 months (1 per month) (regional consultations) to assess and strengthen the analysis of the sector, and ultimately reach agreement with stakeholders on a joint vision, outcomes and targets for the Waste Economy Master Plan.
- 5.3.2 Convene industry reference group as and when to share and test the findings as well as secure buy-in from all social partners as part of this evidence-based research process. Meetings for industry reference groups will be convened via MS teams or zoom meeting platforms.

The following list encompasses the stakeholders which will be consulted (not exhaustive):

- 5.4.1 Development of time-bound programmes/work streams and implementation plans for the Waste Economy Master Plan- responsive to the circular economy to be characterized by economic value,

competitiveness and growth maximization in a sustainable manner for the waste economy value chains. Key elements for consideration include:

- 5.4.1.1 increased demand for new and emerging initiatives that seek to avoid, reduce, recycle, and re-use waste in line with the waste hierarchy principle, hence mitigating potential negative damage to the environment;
  - 5.4.1.2 transformation of some business sectors to end of life (EoL) waste, produce and supply to the domestic and export markets alternative greener products from such material;
  - 5.4.1.3 development of local capabilities and setting up of entities to locally develop and supply to the domestic and export markets, technologies and services to benefitiate End of Life (EoL) waste streams.
  - 5.4.1.4 reduced demand for products from certain sectors that cause environmental damage.
  - 5.4.1.5. increased demand for end of life (EoL) waste and enhanced market for products generated from such.
- 5.4.2 Obtain agreements and support for collective action by Industry, Government and Labour to achieve the vision, outcomes and targets of the Waste Economy Master Plan. It is crucial that stakeholder buy-in and active support for the actions is secured (i.e. through SLAs / MoUs).
- 5.4.3 Clearly defined roles and responsibilities of Industry, Government departments and/or agencies and Labour, in relation to the time-bound programmes/work streams as outlined within the Waste Economy Master Plan (i.e. relevant to the industry-specific and cross-cutting recommendations emerging from status quo analysis; legal framework and policy analysis as well as stakeholder engagement recommendations).
