**CERTIFICATE OF INDEPENDENT BID DETERMINATION**

- 1 This Standard Bidding Document (SBD) must form part of all bids<sup>1</sup> invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).<sup>2</sup> Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
  - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
  - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

<sup>1</sup> Includes price quotations, advertised competitive bids, limited bids and proposals.

<sup>2</sup> Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.

<sup>3</sup> Joint venture or Consortium means an association of persons for the purpose of combining their expertise, property, capital, efforts, skill and knowledge in an activity for the execution of a contract.

## **1. PURPOSE**

- 1.1. To appoint a service provider to develop a strategy for Green Procurement measures to stimulate the supply and demand of the Construction and demolition waste in South Africa, for a period of 12 months.

## **2. INTRODUCTION AND BACKGROUND**

- 2.1. Over the past few years, the approach to waste management in South Africa has largely been that of diverting and adding value to waste materials in support of the growing Secondary Materials Economy. The National Waste Management Strategy (2020) is clear on the Government's position to support the contribution of the waste sector into the growth and development of the Secondary Materials economy.
- 2.2. The emphasis on the diversion of waste away from landfill sites is driven by the need to constantly supply good quality materials so as to strengthen the growth and competitiveness of the Secondary Materials Economy in South Africa.
- 2.3. The Secondary Materials Economy has positive spin-offs as it ensures that the environment is protected whilst it contributes to industrial development and the creation of employment opportunities, especially for low skilled sections of the population.
- 2.4. The drivers for the policy shift towards a Secondary Materials Economy include, amongst others, the increasing prices on raw materials, scarcity of land for new landfill sites, illegal dumping sites, unemployment, and to a larger extent, the growing interest to invest into a low carbon economy.
- 2.5. The Construction and Demolition (C&D) waste constitutes one of the largest waste streams that are generated in South Africa. The demand for Construction and Demolition waste is increasing significantly. In fact, there is a growing body of knowledge that indicates the economic potential of the Construction and Demolition waste as a resource.
- 2.6. Value addition into C&D waste has been witnessed in the private sector through the manufacturing of various types of aggregates and other alternative construction materials such as bricks. Furthermore, Government, especially Municipalities are increasingly looking at the options for diversion and value addition of Construction and Demolition waste with an intention to find solutions to address this waste stream and to address illegal dumping.
- 2.7. However, it seems as if the pace of diversion of the C&D waste is much slower than expected. The latest State of Waste report indicates that the generation of C&D waste constitutes about 13% of the total general waste that is generated in South Africa. A small fraction of this waste is diverted for reuse and recycling. This is a worrying trend considering that the Government has made a commitment to support the growth of the Secondary Materials economy.
- 2.8. The short and long-term interventions to divert and add value to C&D waste, depend on the stimulation of a balanced relationship between supply and demand for the C&D waste. Green procurement is a targeted policy intervention that is used by Governments and the private sector to increase the supply and demand for environmentally friendly products.

- 2.9. The Department has taken a position to lead in the development of the green procurement strategy for the C&D waste with an intention to enhance the diversion of these materials away from the environment, towards supporting the Secondary Materials Economy. The Government and the private sector spend so much money in the procurement of goods and services.
- 2.10. There is so much investment that is taking place in the construction sector. This involves areas such as residential complex development and roads construction. These are some of the areas that need to be explored for the potential absorption of the C&D Waste. The Green Procurement Strategy for C&D Waste needs to explore different levers and options that could be used to unlock opportunities to advance the development of C&D waste sector in South Africa with an intention to divert C&D waste away from the environment and to grow the Secondary Materials Economy.
