1. PURPOSE

To appoint a service provider to develop an inventory and management strategy for Highly Hazardous Pesticides (HHPs) in South Africa.

2. INTRODUCTION AND BACKGROUND

2.1 Introduction to SAICM

At its first session, which took place in Dubai, United Arab Emirates, in 2006, the International Conference on Chemicals Management (ICCM) adopted the Strategic Approach to International Chemicals Management (SAICM), which is comprised of the Dubai Declaration on International Chemicals Management, the Overarching Policy Strategy (OPS), and the Global Plan of Action (GPA). ICCM is the governing body of SAICM. ICCM undertakes a periodic review of SAICM.

SAICM encourages governments and other stakeholders to address chemical safety more effectively in all relevant sectors such as agriculture, environment, health, industry and labour. It supports the achievement of the goal agreed at the 2002 Johannesburg World Summit on Sustainable Development of ensuring that by 2020, chemicals are produced and used in ways that minimize significant adverse effects on the environment and human health. In order to do this it promotes capacity building for developing countries, small island developing states, and countries with economies in transition. It also assists with better coordination of international efforts to improve chemicals management. The Quick Start Programme (QSP) was established for the initial implementation of the objectives of SAICM. The QSP includes a trust fund and multilateral, bilateral and other forms of cooperation.

2.2 Highly Hazardous Pesticides (HHPs) in the context of SAICM

A considerable proportion of the pesticides still being used in the world can be considered highly hazardous, because they have a high acute toxicity, have known chronic toxic effects even at very low exposure levels, or are very persistent in the environment or in organisms, for example. In particular in developing countries, HHPs may pose significant risks to human health or the environment, because risk reduction

measures such as the use of personal protective equipment or maintenance and calibration of pesticide application equipment are not consistently and easily implemented or are not effective. The UN Food and Agricultural Organisation (FAO) is the other Secretariat of the Rotterdam Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade. South Africa is also a Party to the Rotterdam Convention. DEA is the Focal Point for SAICM and also for the Rotterdam Convention in South Africa.

SAICM has been collaborating with FAO in assisting countries in their efforts on environmentally sound management of chemicals in line with the SAICM's 2020 goal on chemicals safety. The FAO Council, at its 131st session in 2006, suggested that priority activities for FAO within SAICM "could include risk reduction, including the progressive ban on HHPs.

As a first step in the development of a risk reduction programme, the FAO/WHO Joint Meeting on Pesticide Management (JMPM), in their 2nd session in October 2008, recommended that HHPs should be defined as having one or more of the following characteristics:

- Pesticide formulations that meet the criteria of classes Ia or Ib of the WHO Recommended Classification of Pesticides by Hazard; or
- Pesticide active ingredients and their formulations that meet the criteria of carcinogenicity Categories 1A and 1B of the Globally Harmonized System on Classification and Labelling of Chemicals (GHS); or
- Pesticide active ingredients and their formulations that meet the criteria of mutagenicity Categories 1A and 1B of the Globally Harmonized System on Classification and Labelling of Chemicals (GHS); or
- Pesticide active ingredients and their formulations that meet the criteria of reproductive toxicity Categories 1A and 1B of the Globally Harmonized System on Classification and Labelling of Chemicals (GHS); or

- Pesticide active ingredients listed by the Stockholm Convention in its Annexes A and B, and those meeting all the criteria in paragraph 1 of annex D of the Convention; or
- Pesticide active ingredients and formulations listed by the Rotterdam Convention in its Annex III; or
- Pesticides listed under the Montreal Protocol; or
- Pesticide active ingredients and formulations that have shown a high incidence of severe or irreversible adverse effects on human health or the environment.

Recognizing that HHPs cause adverse human health and environmental effects in many countries, particularly in low-income and middle-income countries, ICCM4 supported concerted action to address HHPs. Furthermore, ICCM4 welcomed the strategy developed by the Food and Agriculture Organization of the United Nations, the United Nations Environment Programme and the World Health Organization. The Inter-Organization Programme for the Sound Management of Chemicals has agreed to facilitate collaboration, cooperation and contributions of stakeholders in the implementation of the strategy. Furthermore, ICCM4 encouraged stakeholders to undertake concerted efforts to implement the strategy at the local, national, regional and international levels, with emphasis on promoting agro-ecologically based alternatives and strengthening national regulatory capacity to conduct risk assessment and risk management, including the availability of necessary information, mindful of the responsibility of national and multinational enterprises. A considerable proportion of the pesticides still being used in the world can be considered highly hazardous, because they have a high acute toxicity, have known chronic toxic effects even at very low exposure levels, or are very persistent in the environment or in organisms.

In particular in developing countries, HHPs may pose significant risks to human health or the environment, because risk reduction measures such as the use of personal protective equipment or maintenance and calibration of pesticide application equipment are not easily implemented or are not effective. Government and the pesticide industry are encouraged to develop plans of action to reduce risks from

HHPs by taking regulatory or technical action.

3. OBJECTIVES

The objectives of this project are the following:

3.1 Develop an inventory of HHPs in South Africa

3.2 Provide the opportunity to exchange experiences and approaches on how to reduce the risks associated with the use of HHPs

3.3 Facilitate the integration of HHPs into the national sustainable development agenda in South Africa in the context of the National Development Plan (NDP), and facilitate the transition to sustainable development designs and processes regarding HHPs

3.4 To develop a strategy for the management of HHPs in the country in order to reduce the risks from HHPs

3.5 To raise awareness on the matter of HHPs

3.6 To further enable South Africa to contribute to the Global measures undertaken by various countries to reduce HHPs.

3.7 Furthermore, it will provide valuable information to UNEP's work to develop updated global inventories; more so, as South Africa is regarded as a major farming country in the African region.

4. SCOPE AND EXTENT OF WORK

4.1 The study will be undertaken over 18 months. The scope of the study is outlined below. The appointed service provider/s will undertake the following:

4.2 Develop an inventory and the management plan of HHPs

4.3 Collect data on the life cycle information (the production, prevalence, quantities, uses, applications, how is it stored, sources, incidences, imports, exports, packaging, obsolete stockpiles, treatment, disposal methods, associated risks, etc), including going to relevant stakeholders (eg farms and farmers associations, etc)

4.4 Collect information from farm owners and workers on awareness on the risks associated with HHPs

4.5 Collect information on alternatives for HHPs, both reduced risk pesticides and other pest management approaches, in cooperation with relevant stakeholders (eg farms and farmers associations, etc), and looking at experiences from other countries

4.6 Explore and search for alternatives;

4.7 Develop a management plan and risk reduction strategy for HHPs.

4.8 Review the need for the use of HHPs, while simultaneously reviewing use conditions, mitigation measures and comparative risk assessment

4.9 Provide a detailed project implementation plan and methodology

5. EXPECTED DELIVERABLES / OUTCOMES

The study should have the following deliverables:

5.1 An inventory on HHPs and the management plan thereof.

5.3 Information from farm owners and workers on awareness on the risks associated with HHPs

5.4 Information on alternatives for HHPs, both reduced risk pesticides and other pest management approaches, in cooperation with relevant stakeholders (eg farms and farmers associations, etc), and experiences from other countries

5.5 Information on alternatives that are safer, effective, and affordable

19 Guidance for evaluation committee

IN EVALUATING THE TECHNICAL INFORMATION CONTAINED IN THE BID, THE EVALUATION COMMITTEE WILL BE GUIDED BY THE FOLLOWING:

- **Bidder's understanding of the brief** – The bid provides a clear indication that the bidder fully understands the purpose and scope of the work and the bidders' own roles and functions in this regard.
- **Capability and experience** – The bid provides a clear indication that the bidder's team comprises people with the necessary experience, skills, qualifications, knowledge and skills required to ensure the efficient and effective generation of the required deliverables to the highest standards of quality.
- **Track Record** – The bid provides clear information on previous, relevant projects that confirm that the bidder has the required experience and success track record in the area of general project management and management related projects.
- **Qualifying Small Enterprise (QSE):**

A business with an annual turnover more than R10 million but less than R50 million qualifies as a Qualifying Smaller Enterprise (QSE). The QSE scorecard was gazetted in May 2015.

All QSE's are required to use all 5 elements on the amended BEE Scorecard:

1. Ownership
2. Management Control
3. Skills Development
4. Enterprise and Supplier Development
5. Socio-Economic Development

A QSE which is 100% or more black owned automatically qualifies as a Level 1 BEE supplier. A QSE which is 51% Black Owned automatically qualifies as a Level 2 BEE supplier. Therefore a QSE entity of this nature only requires an affidavit in order to state their BEE level and is not required to conduct a full verification.

Please note a QSE for Specialised Enterprises which is 75% or more black owned automatically qualifies as a Level 1 BEE supplier. A QSE which is 51% Black Owned automatically qualifies as a Level 2 BEE supplier. Therefore a QSE entity of this nature only requires an affidavit in order to state their BEE level and is not required to conduct a full verification.

QSEs are required to qualify under one of the following criteria in order to receive a QSE certificate;

1 April 2017

- At least 25% of costs of sales excluding labour costs and depreciation must be procured from local producers or local supplier in SA (for service industry labour cost are included but capped to 15%)
- 50% of jobs created are for black people provided that the number of black employees since the immediate prior verified B-BBEE measurement is maintained.
- At least 25% transformation of raw material/beneficiation which include local manufacturing, production and/or assembly, and/or packaging.
- At least spend 12 days per annum of productivity deployed in assisting black EME's and QSE's beneficiaries to increase their operation or financial capacity.
- At least 85% of labour costs should be paid to South African employees by service industry entities.
- **EME's (Exempted Micro Enterprises)**
- With the new B-BBEE Codes of Good Practice gazetted on 11 October 2013, enterprises with an annual turnover less than R10 million qualify as an EME. Please note that this does not apply to those who fall within gazetted Sector Codes (i.e those in Construction, Forestry, Tourism, Transport, Chartered Accountancy (CA), Information and Communication Technology (ICT), Property, Agriculture, Financial Services) until these Sector Codes have been updated. The only requirement is a Sworn Affidavit confirming turnover for the past 12 months and the level of black ownership of an enterprise. EMEs then automatically qualify as follows:
 - <51% Black owned will qualify for Level 4 BEE status
 - ≥51% but <100% Black owned will qualify for Level 2
 - 100% Black Owned will qualify for Level 1

CERTIFICATE OF INDEPENDENT BID DETERMINATION

- 1 This Standard Bidding Document (SBD) must form part of all bids¹ invited.
- 2 Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).² Collusive bidding is a *pe se* prohibition meaning that it cannot be justified under any grounds.
- 3 Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
 - a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
 - b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.
- 4 This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.
- 5 In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

¹ Includes price quotations, advertised competitive bids, limited bids and proposals.

² Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.
